

# Άσκηση 3 - ΕΠΛ 341

Ονόματα: 1. Έλια Νικολάου 1012334

## Επεξήγηση – Σκοπός Προγράμματος

Στο πρόγραμμα αυτό έχουμε ως σκοπό να επιλύσουμε 2 προβλήματα, να μοντελοποιήσουμε σε PDLL/STRIPS ένα πρόβλημα μεταφοράς πακέτων μεταξύ τοποθεσιών που βρίσκονται σε διάφορες πόλεις οι οποίες συνδέονται με ένα οδικό, σιδηροδρομικό και ατμοπλοϊκό δίκτυο με βάση την περιγραφή που μας δίδετε.

Επεξήγηση Αρχείων: Ολόκληρη η υλοποίηση της άσκησης απαρτίζεται από 3 αρχεία.

#### **Αρχείο 1 : domain.pddl**

Το domain αρχείο ορίζει τις "καθολικές" πτυχές ενός προβλήματος. Ουσιαστικά, αυτές είναι οι πτυχές που δεν αλλάζουν ανεξάρτητα από τη συγκεκριμένη κατάσταση που προσπαθούμε να λύσουμε. Αυτό είναι κυρίως οι τύποι αντικειμένων, οι κατηγορίες και οι ενέργειες που μπορούν να υπάρχουν στο μοντέλο.

# <u>Αρχείο 2 : Problem1.pddl</u>

Το αρχείο αυτό περιέχει μοντελοποιημένα ένα πρόβλημα μεταφοράς μικρού μεγέθους το οποίο έχει 2 χώρες, 3 πόλεις, 7 τοποθεσίες (λιμάνια, σταθμούς, αποθήκες), 2 πλοία, 2 φορτηγά/πόλη, 2 ατμομηχανές, 6 βαγόνια, και 10 πακέτα (τα πακέτα σας πρέπει να είναι κατανεμημένα στα διάφορα σημεία. Το αρχείο σε συνδυασμό με το domain μας, τρέχει αποτελέσματα στο τρέχει αποτελέσματα στο σχεδιαστή ΛΑΜΑ.

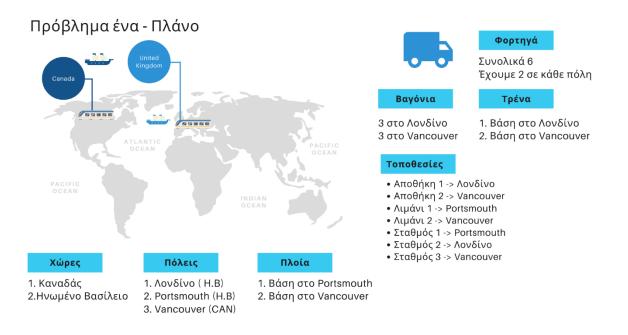

## **Αρχείο 3 : Problem3.pddl**

Το αρχείο αυτό περιέχει ένα πρόβλημα μεταφοράς το οποίο έχει 4 χώρες, 7 πόλεις, 15 τοποθεσίες και 20 πακέτα και ανάλογο αριθμό ατμομηχανών, βαγονιών, πλοίων . Το αρχείο σε συνδυασμό με το domain μας, τρέχει αποτελέσματα στο τρέχει αποτελέσματα στο σχεδιαστή ΛΑΜΑ.

## Επεξήγηση Πλάνου Προβλημάτων & Παρουσίαση αποτελεσμάτων.

#### Πρόβλημα 1: problem1.pddl

Το πλάνο που αποφάσισα για το πιο πάνω πρόβλημα είναι το εξής ( παρουσίαση μέσω σχεδιαγράμματος)

Ουσιαστικά έχουμε 2 χώρες το Ηνωμένο Βασίλειο και τον Καναδά. Έχουμε 3 πόλεις, το Λονδίνο και το Portsmouth που ανήκουν στο Η.Β και το Vancouver που ανήκει στο Καναδά. Σε κάθε πόλη έχουμε 2 φορτηγά. Έχουμε 2 αποθήκες, 1 σε μια πόλη της κάθε χώρας, έχουμε 3 σταθμούς, 1 σε κάθε πόλη. Έχουμε ακόμη 2 τρένα, ένα στο Λονδίνο και ένα στο Vancouver. Όσο αφορά τα βαγόνια, έχουμε 3 στο Λονδίνο και 3 στο Vancouver.

\*Σημείωση: η ακριβές τοποθεσία του κάθε αντικειμένου, δηλαδή σε ποια τοποθεσία βρίσκεται ( Λιμάνι , Σταθμός κλπ..) ορίζεται στο πρόβλημα=> αποτελεί την αρχική μας κατάσταση του προβλήματος.

Η λογική του goal state μας βασίζεται στα πακέτα.

# Πρόβλημα 2 : problem2.pddl

Το πλάνο που αποφάσισα για αυτό το πρόβλημα είναι το εξής ( παρουσίαση μέσω σχεδιαγράμματος)

Ουσιαστικά έχουμε 4 χώρες το Ηνωμένο Βασίλειο, τον Καναδά, το Μεξικό και την Γερμανία. Έχουμε 7 πόλεις όπως παρουσιάστηκε πιο πάνω στο σχεδιάγραμμα. Σε κάθε πόλη έχουμε 2 φορτηγά. Έχουμε 4 αποθήκες, 1 σε κάθε χώρα, έχουμε 7 σταθμούς, 1 σε κάθε πόλη. Έχουμε ακόμη 4 τρένα. Όσο αφορά τα βαγόνια, έχουμε 14 συνολικά 2 σε κάθε σταθμό.

<sup>\*</sup>Σημείωση: η ακριβές τοποθεσία του κάθε αντικειμένου, δηλαδή σε ποια τοποθεσία βρίσκεται ( Λιμάνι , Σταθμός κλπ..) ορίζεται στο πρόβλημα=> αποτελεί την αρχική μας κατάσταση του προβλήματος.

Η λογική του goal state μας βασίζεται στα πακέτα αλλά μπορείτε να δείτε όλη την αρχική κατάσταση στο πρόβλημα 2.
